

On behalf of Mr. Joe Paiva, Executive Director, VLER, the following information is provided as input to the weekly Cabinet Report:

16-20 July 2012

Virtual Lifetime Electronic Record

During the week of 16-20 July 2012, a draft of the Business Requirements Document (BRD) for Federal Case Management Tool (FCMT) migration will be completed. This BRD outlines business requirements essential to a successful migration of the VHA liaison, VBA Chapter 63 Special Outreach and Casualty, VBA liaison and Integrated Disability Evaluation System (IDES) customers to FCMT. The BRD development included collaboration between Executive Director Virtual Lifetime Electronic Record (ED VLER), VLER Information Technology Program Management Office (IT PMO) Wounded Warrior Program, Health Systems, and the Office of Business Process Integration (OBPI), and Veteran Tracking Application (VTA) users from the Veterans Health Administration (VHA) and Veteran Benefits Administration (VBA). The migration of all VTA customers to FCMT will better enable the Department of Veterans Affairs (VA) to proactively deliver the full continuum of services and benefits to our nation's wounded, ill, and injured warriors.
